

SKILLING SOLUTIONS

Future Forward Skills Mission

Sattva launched the Future Forward Skills Mission in partnership with Tata Trusts and the UKIBC.

The Mission aims to catalyse market-based employability solutions that address the aspirations of India's young workforce and make them future-ready. It is open for non-profits, trusts and societies that have an established proof of concept for a skilling solution. The Mission provides funding, mentoring, implementation support and capability building to the awardees.

The impact of the solution will be evaluated based on the – number of people employed/ self-employed, their income premium and the number of skilling organisations which have become sustainable.
