# Procuring for Impact

Building Pathways to Inclusive Supply Chains

Led by Sattva Consulting and Vrutti, with support from SAP CSR, this initiative enables organisations to integrate inclusive and sustainable enterprises into their procurement processes. Our goal is to provide practical, credible pathways that make responsible sourcing actionable.

This catalogue presents five procurement categories that organisations can easily begin with, areas where shifting even a portion of existing spends can create tangible impact. Each category features vetted enterprises from across India whose products and practices strengthen local livelihoods, promote sustainability, and build more equitable supply chains.

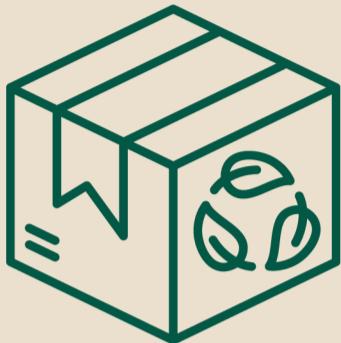

Whether it is gifting, sustainable packaging, pantry essentials, stationery, or office-use supplies, these categories offer simple, high-volume entry points for embedding impact into routine procurement. Every purchase becomes more than a transaction, it becomes a reflection of your organisation's commitment to people, planet, and purpose.

To learn more or explore how we can support your needs, please contact:

- **Tisha Jhaveri** ([tisha.jhaveri@sattva.co.in](mailto:tisha.jhaveri@sattva.co.in))
- **Arya Raj** ([arya.raj@catalysts.org](mailto:arya.raj@catalysts.org))

## Every procurement choice carries a message.

It reflects how your organisation values its stakeholders and how it lives its commitments.

**Sustainable Packaging:** Switching to biodegradable, compostable, and recycled materials is more than an operational change; it signals your organisation's commitment to reducing waste and embedding sustainability into everyday processes.

**Corporate Gifting:** Thoughtfully curated, impact driven gifts tell meaningful stories about your brand. They create memorable experiences while supporting enterprises that advance sustainability, artisanship, and inclusive growth.

**Pantry & Cafeteria Supplies:** Daily-use consumables sourced from inclusive and eco-friendly enterprises can significantly reduce your environmental footprint while strengthening local livelihoods, making routine operations more responsible.

**Stationery & Desk Supplies:** Tree-free paper, recycled stationery, and artisan-made desk essentials are simple switches that demonstrate your organisation's commitment to responsible sourcing and conscious consumption.

**Housekeeping & Office-use Products:** Eco-friendly cleaning supplies, responsibly made utility items, and low-impact office essentials help translate sustainability commitments into visible, day-to-day practice across your workspace.

## Sustainable Packaging Materials

Our packaging list features diverse, green, and 100% compostable solutions.

**Green Amor**

Kerala

[greenamor.in](http://greenamor.in)

---
